Erasmus+ Student Mobility for ICT Summer School in Metropolia University / 2026 Summer

We are pleased to announce that the ICT Summer School at Metropolia University of Applied Sciences will take place again in August 2026.

We kindly invite students from your university to participate!

Programme and Courses

The programme is now available on our [website](#) with [course descriptions](#), and a few more courses may be added later.

All courses are taught in English. Most courses will be offered on campus or in a blended format, while some are only available online.

ICT Summer School 2026

Dates: 3 - 21 August 2026

Nomination & Application Deadline: 24 May 2026

Fees: No tuition fees for students from partner universities. However, students are responsible for arranging and covering their own travel, accommodation, and subsistence expenses.

Important:

- Official nomination from the home university is required. Without a nomination, applications cannot be considered.
- Only degree students can be nominated for the ICT Summer School.
- After nomination, we will send detailed application instructions directly to the nominated students.

We kindly ask you to share the following application process information with your nominated students.

Application Process:

When registering with the [online form](#), students must select:

- Academic year: **2026/2027**; Semester : **Autumn 2026**
- Field of Study at Metropolia: **Technology**
- Purpose of the short-term mobility period: **ICT Summer School**
- Degree Programme at Metropolia: **Information and Communications Technology, 0610**

When selecting the courses :

- Each course typically lasts about 3–4 hours per day. For a manageable workload, we recommend taking no more than 2 courses per week.
- Students may register for as many courses as they wish, provided the schedules do not overlap (only one course per time slot).
- Please check the course schedule carefully to avoid selecting courses with conflicting times. **Course requests with overlapping schedules will not be considered.**
- Please note, we are unable to accept priority or alternate course requests (e.g., "if not Course A, then Course B"). Only the courses selected in the application will be considered.
- If students are not selected for their chosen courses, after the registration period ends they will have the opportunity to request registration for other available courses.

Key Points:

- The deadline for nomination and application is **24 May 2026. Late nominations or applications cannot be accepted.**
- Applicants will be informed in June about which courses they have been selected for. Please note that the most popular courses may fill up quickly, so early registration is strongly recommended.
- The ICT Summer School is organized at [Metropolia Myyrmäki campus](#)
- Metropolia does not arrange accommodation. Students are responsible for finding their own housing. Information about short-term accommodation options can be found on our website [short-term options \("private market"\)](#).
