

Company: MapperX

Position: Full Stack Developer - Intern

About the Role

We are looking for a **Junior Full Stack Developer** to join our team. You will work on real products across both **web** and **mobile platforms**, using technologies like **Angular**, **React**, **React Native**, and **NoSQL databases**. This is a great opportunity for someone early in their career who is passionate about building user interfaces and handling real-time data.

Responsibilities

- Assist in developing and maintaining web applications using Angular
 - Help build and test mobile applications using React Native
 - Work with NoSQL databases (like Firebase) for storing and retrieving data
 - Write clean, simple, and well-documented frontend code
 - Collaborate with the team using Git for version control
 - Support UI localization, responsiveness, and performance improvements
 - Learn from team members and participate in technical discussions
-

Requirements

- Studying computer engineering or a related field
- Hands-on experience with TypeScript
- Basic knowledge of Angular, React, and React Native
- Familiarity with NoSQL databases and frontend/backend communication
- Internship or academic project experience in frontend or mobile development
- Basic Git knowledge and ability to work in a version-controlled environment
